SECTION SIXTEEN: OTHER INFORMATION

Disclaimer

This MSDS has been prepared according to Work Safe guidelines and with reference to the best available information at the time of preparation. Since we are unable to control and/or anticipate all conditions under which the product may be used, each user must review this MSDS and assess it in the context of their circumstances in order to determine the most appropriate usage and handling procedures for their situation. If clarification or further information is needed to ensure that an appropriate assessment can be made, then the user should contact the manufacturer.

Allergies

There is always a possibility of an individual being allergic to one or several ingredients within a product. A low irritant claim does not infer that susceptible individuals will not react adversely. Allergies are very much a personal condition and do not in any way indicate a fault with the formula or substances involved. Natural substances particularly are vulnerable to seasonal and other variations that may contribute to unanticipated reactions. Unfortunately, often the only remedy in these situations is to ascertain the exact cause of the reaction (typically with professional medical help) and then to avoid all future exposure.

Animal Products

Suitable for vegetarians
