

Ginkgo Moist

with Grape Stem Cells to Protect Against Aging

Grape Stem Cells | Peptides | Ginkgo Biloba Extract | Ginseng Extract

DESCRIPTION:

Renew, brighten and moisturize skin with this lightweight yet power-packed daily moisturizer. Grape Stem Cells renew skin as well as protect against and reverse the aging effects of UV radiation. Fruit acids help to reduce pigmentation, and Peptides, Green Tea Extract and Ginkgo Biloba Leaf work synergistically to boost skin elasticity, retain skin's moisture, and reduce the depth of wrinkles. Active ingredients are incorporated into our advanced Alphasomes® skin care delivery system to deliver the active ingredients to the target skin area.

FEATURES AND BENEFITS:

Protect Against and Reverse Aging with Grape Stem Cells | Vitis Vinifera (Grape) Fruit Cell Extract protects skin against the harmful effects of skin stress caused by UV radiation, responsible for 80% of skin aging, with epigenetic factors and metabolites. It delays the senescence, or the biological aging of essential cells, as well as fights photo aging. The cell extract has an extremely high anthocyanin content which is high in powerful antioxidants and has free radical scavenging capabilities.

Tighten Skin and Restore Elasticity | Black Currant Extract, Palmitoyl Tripeptide-5 and Green Tea Extract tighten skin and restore elasticity.

Lighten Pigmentation | Sage Extract, blended with Aloe Extract and Lactic Acid help to lighten pigmentation.

Balance Skin | Olive Leaf Extract, Olive Fruit Oil, Ginkgo Biloba Leaf Extract and Panax Ginseng Extract help to increase oxygenation in the skin and act as a natural skin balancer.

USAGE: Gently smooth onto cleansed skin in an upward and outward motion.
