TATTOO WAX Q&A

Q Is this Cirépil Boudoir?

A This is not Cirépil Boudoir - Cirépil Boudoir was a wax that facilitated a new wax treatment, tattoo waxing. Due to its incredible success Perron Rigot's R & D were inspired thus creating the first ever patented TATTOO WAX.

Q How does this wax compare to other waxes?

A There is no comparison - Cirépil Tattoo Wax was formulated, designed and is marketed to help you make more money and generate new clients by offering new treatment options with a NEW WAX SERVICE.

Q What makes tattoo wax exfoliating?

A Waxing is a mechanical process of exfoliation; however, exfoliation alone does not ensure a brighter tattoo. This formula was clinically tested and proven in an independent laboratory to be a combination of exfoliation and hydration making a tattoo brighter. Not all wax will hydrate and brighten a tattoo.

Q Is this wax also good to remove hair?

A Brighten a tattoo, remove hair, or both. Created with sensitive skin in mind, Cirépil Tattoo Wax can be used on all areas of the body and all hair types.

Q What ingredient makes it hydrate?

A Clinically proven Cocosnucifera (coconut oil) provides hydrating results. Cirépil Tattoo Wax has been dermatologically tested and is great for sensitive skin.
