4. First aid measure

Description of first aid measures	General information In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible). After inhalation In case of accident by inhalation: remove casualty to fresh air and keep at rest. In case of respiratory tract irritation, consult a physician. After contact with eyes Rinse cautiously with water for several minutes. In case of troubles or persistent symptoms, consult an ophthalmologist. After ingestion Rinse mouth thoroughly with water. Let water be drunken in little sips (dilution effect). Do NOT induce vomiting. In all cases of doubt, or when symptoms persist, seek medical advice.
-----------------------------------	---

Most important symptoms and effects, both acute and delayed	No information available.
Indication of any immediate medical attention and special treatment needed	Treat symptomatically

5、 Fire-fighting Measures

Extinguishing media	Suitable extinguishing media Carbon dioxide (CO₂). Dry extinguishing powder. alcohol resistant foam. Atomized water. Unsuitable extinguishing media High power water jet.
---------------------	--

Specific hazards arising from the chemical	Can be released in case of fire: Carbon monoxide, Carbon dioxide (CO ₂).
Special protective equipment and precautions for fire-fighters	In case of fire: Wear self-contained breathing apparatus.
Additional information	Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water. Coordinate fire-fighting measures to the fire surroundings.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures	See protective measures under point 7 and 8.
Environmental precautions	Discharge into the environment must be avoided.
Methods and material for containment and	Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Treat the recovered material as prescribed in the section on waste disposal .

cleaning up	Clean contaminated objects and areas thoroughly observing environmental regulations.
Reference to other sections	Safe handling: see section 7 Personal protection equipment: see section 8 Disposal: see section 13

7、 Handling and Storage

Precautions for safe handling	Advice on safe handling Wear suitable protective clothing. (See section 8.) Advice on protection against fire and explosion Usual measures for fire prevention. Further information on handling General protection and hygiene measures: refer to chapter 8
	Requirements for storage rooms and vessels Keep container tightly closed in a cool, well-ventilated place. Advice on storage compatibility Do not store together with: Explosives. Oxidizing solids.

Conditions for safe storage, including any incompatibilities	Oxidizing liquids. Radioactive substances. Infectious substances. Food and animal feedingstuff. Further information on storage conditions Keep the packing dry and well sealed to prevent contamination and absorption of humidity. Recommended storage temperature: 20°C Protect against: Light. 8. Exposure Controls and Personal Protection

Control parameters	Additional advice on limit values The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.
Exposure controls	Appropriate engineering

controls No special measures are necessary. **Protective and**

hygiene measures

Always close containers tightly after the removal of product. When using do not eat, drink, smoke, sniff. Wash hands before breaks and after work.

Eye/face protection

Wear safety glasses; chemical goggles (if splashing is possible). Standards: EN 166 or

29 CFR 1910.133 Hand protection

In case of prolonged or frequently repeated skin contact: Wear suitable gloves.

Suitable material:

FKM (fluororubber). - Thickness of glove material: 0,4 mm Breakthrough time ≥ 8 h

Butyl rubber. - Thickness of glove material: 0,5 mm Breakthrough time ≥ 8 h

CR (polychloroprenes, Chloroprene rubber). - Thickness of glove material: 0,5 mm Breakthrough time ≥ 8 h

NBR (Nitrile rubber). - Thickness of glove material: 0,35 mm Breakthrough time ≥ 8 h

PVC (Polyvinyl chloride). - Thickness of glove material: 0,5 mm Breakthrough time ≥ 8 h

Before using check leak tightness / impermeability. In the case of wanting to use the gloves again, clean them before taking off and air them well.

Skin protection

Suitable protective clothing: Lab apron.

Respiratory protection

With correct and proper use, and under normal

conditions, breathing protection is not required.

Respiratory protection necessary at:

exceeding exposure limit values

Suitable respiratory protective equipment: half-mask with filter EN 149 or 29 CFR 1910.134 .

The filter class must be suitable for the maximum contaminant concentration

(gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.

Environmental exposure controls

No special precautionary measures are necessary.
